Kashif Sulehria

React Developer / VueJs Developer at SoftPyramid

As a front-end engineer with experience in React, Vue, and jQuery, I have a strong understanding of web development technologies and are able to create interactive and user-friendly web applications.

React is a popular JavaScript library for building user interfaces that allows for the creation of reusable components and efficient updates to the DOM (Document Object Model). Vue is a progressive JavaScript framework for building user interfaces that is lightweight and easy to learn. jQuery is a fast, small, and feature-rich JavaScript library that simplifies HTML document traversing, event handling, and animating.

You are skilled in using these tools to develop responsive and interactive web applications that meet the needs of users and clients. I am also able to troubleshoot and debug front-end issues and have a good understanding of web design and user experience principles.

📊 Strengths & Skills

- ✔ TailwindCSS
- ✔ React
- ✔ CSS
- ✔ VueJs
- ✔ TypeScript
- ✔ JavaScript
- ✔ Redux Toolkit
- ✔ PSD to HTML

☑ Experience **2** years

Soft Pyramid
